fall into that category. It really speeds up the work of narrowing down the books to find what I'm looking for.

Camera Flash Guide Number

Guide numbers are the standardized, numerical way of determining the power of a flash, with a higher guide number representing a more powerful flash. A guide number is the product of multiplying the f/stop of an exposure with a given distance, at ISO 100; or $GN = f/\text{number} \times \text{distance}$.
