A cable converter box or television converter box is an electronic tuning device that transposes/converts channels from a cable television service to an analog RF signal on a single channel, usually VHF channel 3 or 4, or to a different output for digital televisions such as HDMI.. The device allows a television set that is not "cable ready" to receive cable channels.

Rated 4 out of 5 by Kenney G from Good Basic Tuner and Recorder I bought this box about a week ago. The first thing I noticed were the two AAA batteries that were included for the remote were dead. After fresh batteries, the remote worked as it should. It would be nice if the instruction manual was alittle more complete.

The first product Naim put on the market was the NAP160 power amplifier; it was soon followed by the NAC12 pre-amplifier. The two-channel NAP 250 amplifier, launched in 1975, is perhaps Naim Audio's most well-known analogue product, as its basic circuit layout was shared by all the company's power amplifiers until the introduction of the flagship NAP500 in 2000.

The RCA audio outonly works with powered speakers or audio units. Optical out socket on the LG TV is the only audio that works, but there's only one on my LG TV and that goes to my soundbar. I bought a 2 to 1 splitter box and plugged both the transmitter and the soundbar into the one input on the tv and that worked.
